

PESECO

ENERGY SOLUTIONS

Who We Are

- Founded in 1998, PESECo Ltd is a leading independent supplier to the Oil, Gas and renewable energy sectors.
- We specialize in the supply of OCTG products & associated accessories, Conductor pipe & Line pipe.
Supply of Surface and Subsea Oilfield equipment systems & services.
- Our management team has over 25 years of experience and a strong reputation for reliability and flexibility.
- Fully certified under ISO 9001:2015, ISO 14001:2015 and ISO 45001:2018.

Why Partner with PESECo

Our objective is to provide our customers with a solid platform of products and services:

Direct mill access
ensuring shorter lead
times

Proven partnerships
with major operators

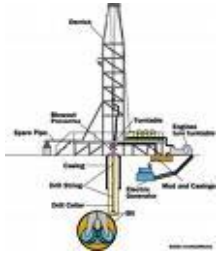

Commitment to quality,
safety and sustainability

A yard located in The
Netherlands for rapid
European supply

SUPPLY CHAIN OVERVIEW

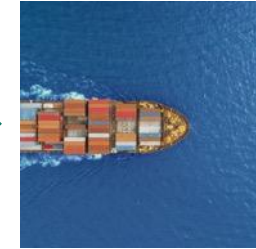

Analysis of Drilling Program & Well planning schedule

Order placed on Mill

Third Party Inspection at the Mill

Transport to Stock, Customs clear. Document check

Store awaiting call off to the field

Onshore Prep & Inspection, Load out to customer.

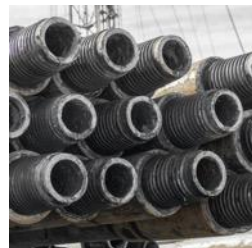

Maintain stock

Rig Returns (pipe returned from wells)

Onshore de-prep Inspection, repair as required

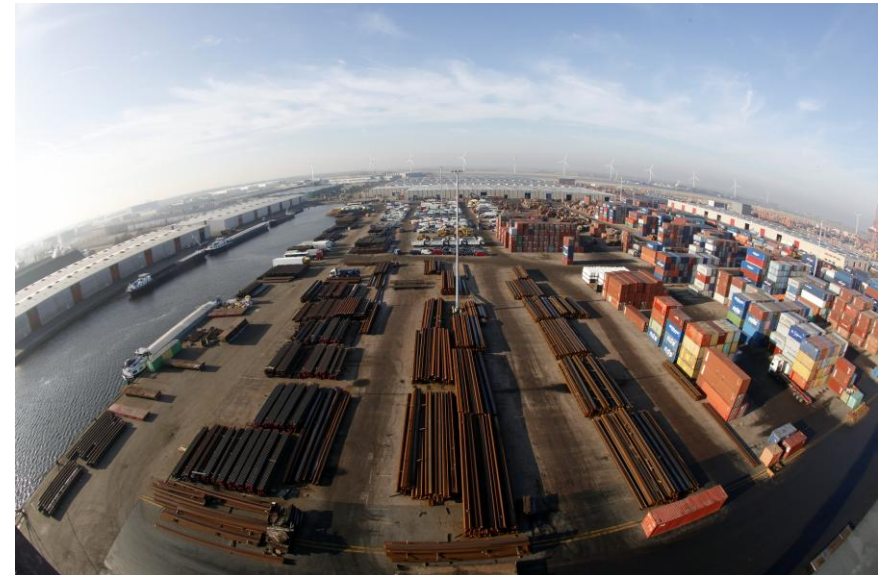

Return to stock

Re-Circulate to the next well

The Netherlands yard

- Strategic European hub located in Amsterdam
- Stocking & inspection facilities
- Efficient logistics and dispatch management
- Ideal location for worldwide operations

Geothermal & Renewable Transition

- Already specialized in supplying OCTG and associative products to the Oil and Gas Industry, we have successfully advanced and transferred our know-how to the Geothermal Industry. PESECo has supplied equipment used on several geothermal deep drilling projects for major industrialists.
- With our product expertise and industry knowledge, we plan to go beyond supplying to energy providers and become a supplier of green energy. We are determined to utilize geothermal heat to generate innovative energy.
- PESECo are entering into strategic partnerships with industry experts who are experienced in delivering and managing geothermal projects.
With this we hope to realise the most optimal use of geothermal energy for district heating for the benefit of the built-up environment, whether in combination with business, industrial or agricultural heat supply.
